PROFESSIONAL SUMMARY

Results-driven Full Stack Developer specializing in the MERN stack, React Native, and LLM-powered applications, with proven experience architecting, developing, and deploying production-ready web and mobile applications. Adept at building scalable RESTful APIs, implementing robust JWT authentication, and managing complex cloud infrastructure using AWS (EC2, CloudFront), Nginx, and automated CI/CD pipelines. Strong track record of bridging the gap between high-performance frontend interfaces and secure, transaction-safe backend services.

TECHNICAL SKILLS

Frontend Web & Mobile:	JavaScript, React.js (Vite), React Native, TypeScript, Expo (EAS), HTML5, CSS3, SCSS/SASS, React Router, Context API
Backend & APIs:	Node.js, Express.js, RESTful APIs, JWT Authentication, Bcrypt, Axios, Google Gemini API, Cloudinary API, Razorpay API
Databases:	MongoDB Atlas, MySQL 8.0, AWS RDS
Cloud, DevOps & Tools:	AWS (EC2, S3, CloudFront), Nginx, GitHub Actions, CI/CD, PM2, Vercel, Render, Git/GitHub, Linux
AI & LLM:	Large Language Models(LLMs), Generative AI, Google Gemini API, LLM API Integration, AI Chatbot

FEATURED PROJECTS

GK's Fitness Shop AI Powered E-Commerce Cloud Platform

Live Frontend Backend

Tech Stack: React.js, Express.js, MongoDB, AWS (EC2, S3, CloudFront), Nginx, GitHub Actions, Razorpay API, Google Gemini API, Cloudinary API

- Architected and deployed a highly responsive MERN stack e-commerce application on AWS, utilizing S3/CloudFront for the frontend and an EC2 Ubuntu instance behind an Nginx reverse proxy for the backend.
- Automated CI/CD pipelines using GitHub Actions, enabling zero-downtime deployments, automatic Git pulling, PM2 process restarts, and dynamic CloudFront cache invalidation.
- Implemented advanced authentication flows featuring Email OTP validation, secure JWT session management, and real-time UI security checklists.
- Engineered secure payment workflows with Razorpay cryptographic signature verification, integrated with a transaction-safe inventory engine that dynamically handles stock deductions and cancellations.
- Integrated an LLM-powered AI shopping assistant to understand natural-language customer queries and provide context-aware fitness product recommendations.
- Integrated Cloudinary API for secure cloud-based image upload, storage, and optimized delivery of product images.

GK's Fitness Shop – AI Powered Mobile E-Commerce App

Live (APK) GitHub

Tech Stack: React Native, TypeScript, Expo Router, Context API, Node.js, MongoDB, AWS EC2, EAS CI/CD

- Architected and deployed a full-stack e-commerce mobile application for Android using React Native, TypeScript, and Expo Router, connecting to the scalable Node.js backend hosted on AWS EC2.
- Established a mobile CI/CD pipeline utilizing Expo Application Services (EAS); leveraged EAS Update to push Over-The-Air (OTA) JavaScript bug fixes to production within minutes, bypassing standard APK rebuild cycles.
- Optimized mobile UI/UX architecture by utilizing reusable layout wrappers (ScreenContainer), dynamic FlatLists, and conditional rendering to handle empty states, unauthenticated user prompts, and seamless component mounting.

Fit-Track Pro: Full-Stack Fitness Tracking

Live Frontend Backend

Tech Stack: React.js, Vite, Node.js, Express.js, SCSS, JWT, Vercel, Render

- Engineered a lightning-fast frontend using Vite and custom SCSS, achieving a 100% fully responsive design with modern glassmorphism UI principles without relying on heavy external CSS frameworks.
- Implemented a secure RESTful API backend architecture using Node.js and Express.js, utilizing JWT (JSON Web Tokens) and bcrypt for robust stateless user authentication and data protection.
- Managed end-to-end deployment pipelines; hosted the client-side on Vercel and backend on Render, successfully resolving complex Linux case-sensitivity build failures during the CI/CD process.

Full-Stack Inventory Management System

Live Frontend Backend

Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), React Router, Axios, RESTful APIs, Git/GitHub, Vercel, Render

- Engineered a scalable, decoupled MERN architecture featuring a fully responsive Single Page Application (SPA) to efficiently handle real-time inventory tracking and dynamic UI updates across all devices.
- Developed and secured RESTful APIs utilizing Axios for asynchronous client-server communication, integrating MongoDB Atlas to facilitate robust CRUD operations and reliable cloud data persistence.

EDUCATION

Dr. M.G.R. Educational and Research Institute, Chennai

Graduated: 2024

Bachelor of Technology (B.Tech) - Computer Science and Engineering
